

Discussion series «Hydrogen Economy Development in Ukraine»

**International online discussion № 9
“Hydrogen economy development: from idea to projects implementation”**

13 October 2022, 12:00-13:30 (Kyiv time), online

The State Agency on Energy Efficiency and Energy Saving of Ukraine together with the business community "Energy Club" is holding a series of highly specialized professional discussions on ways to develop the hydrogen economy in Ukraine.

The new hydrogen industry must be built in a way to provide Ukraine with a competitive position on the world energy arena.

Discussion participants - representatives of government, business, science, education, international and expert community - will raise and outline all the issues of the new industry development, focusing on each stage of the chain: from hydrogen production to its consumption.

Key issues:

- strategic vision;
- peculiarities of the hydrogen projects development and implementation;
- key components of hydrogen projects;
- difficulties during project implementation;
- ways of financing;
- equipment market for hydrogen projects.

Moderator – Andriy Kulykov, journalist, TV and radio host, media expert.
